Re: Energy Saving Program

To Whom It May Concern:

I have been associated with Energy Enterprises for about 10 years. They have undoubtedly saved our company thousands of dollars in our energy program. They have also assisted me in developing energy savings programs. They have taken charge of 2 lighting programs through NYSERDA which was complete, and very thorough.

Their services of purchasing natural gas and electric in the open market, along with weekly meter readings, timely monthly reporting, auditing, and budgets have kept us in line with our energy budgets. They continue to work with us to help us maintain an energy efficient plant. I am offering this testimonial as a reflection of EE being a reliable source in keeping energy costs in check.

Sincerely;
