Re: Energy Saving Program

To Whom It May Concern:

We offer this testimonial as a reflection of our satisfaction with the service that has been offered by Energy Enterprises, Inc. (EE). We have found they have a very high degree of knowledge related to the energy business and are all ways ready to share their information when called upon.

Their services have included purchasing of natural gas and electric, weekly monitoring of natural gas, monitoring electric profiles, monthly reporting and auditing. Using "Energy Benchmarking" (energy cost per square foot) EE is currently working with NYSERDA to reduce energy cost in our Schools. The District has been a client for many years and continues to work with EE to answer questions and assist in the development of our energy budgets.

Sincerely,

Bart Schuler
Business Administrator
